Art Unit: 3723

The 3/10/40 IDS contains US patent application numbers. These items have been lined through by the examiner because a US patent application is not prior art. Certain of the items on the 6/8/04 IDS do not have a date. These items have also been lined through by the examiner since items that do not have a date may not properly be considered to be prior art.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "attachment mechanism" recited in claim 2 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claims 1-3, 11-13, and 19-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is unclear how the "plurality of grooves for engaging an attachment mechanism" actually perform an attachment function. The disclosure fails to discuss this feature. The disclosure in this regard is inadequate.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacob.

Jacob shows a fish tape 13 as shown in Figure 3. The exterior of the fish tape has spiral grooves. Column 1, line 10 indicates that the fish tape is made from steel.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacob in view of Prior Art Figure 1 of the instant case.

Prior Art Figure 1 of the instant case shows that a fish tape is commonly stored in a reel.

To provide a reel for the fish tape of Jacob would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Prior Art Figure 1. One of ordinary skill in the art would have been motivated to do this in order to provide a convenient means of storing and dispensing the fish tape.

Claims 4-10 and 14-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/21/05.
